Brandt Unveils New Diesel and EZMove Options for 1340 Transport Auger

Regina, Saskatchewan – Brandt is proud to now offer the **1340 Transport Auger** with a **49 hp Deutz Diesel Motor** and **EZMove System**. Unveiled at the 2014 Canada's Farm Progress Show in June, these new options for the 1340 transport auger make it more efficient and easy to use than ever before.

Move up to 9,000 bushels per hour using the completely self-contained 1340 Transport Auger with diesel drive. The efficient 49 hp Deutz Diesel motor uses less fuel than an equally sized gas motor and provides plenty of power to move grain quickly.

The available heavy duty EZMove system allows a single operator to easily operate and move the 1340. The exclusive joystick controlled power steering delivers improved control with less effort. Steering tires are in line to the walking beam which provides better steering and equal turning circles. In addition, speed can be precisely adjusted using a simple ball valve control.

Brandt Agricultural Products Ltd. engineers and manufactures a complete line of grain handling equipment including grain augers, grain belt conveyors, grain carts, grain vacs, grain bag loaders, and grain bag unloaders as well as heavy harrows.
