

News Release

FOR IMMEDIATE RELEASE
Saskatchewan – June 11, 2015

Brandt heavy harrow spreads its wings.

New 102ft model sets new industry standard for performance.

Brandt Agricultural Products Ltd. is pleased to announce a brand new 102ft addition to its industry-leading heavy harrow product line.

“The combination of increased wing span with improved rigidity, ground clearance and parallel arm travel make this new model a big winner,” says Brandt Agricultural Products Canadian Sales Manager, Arnie Josephson. **“This is exactly the product that our customers have been looking for and we’re very excited to be able to offer it to them for the 2015 Fall work season.”**

Designed for today’s larger equipment, working larger farming operations, Brandt’s new heavy harrow utilizes heavy-duty 12”x12”x3/8” wing beams – a 50% increase in size – along with its patented parallel link tine section to deliver maximum rigidity and minimum wing bounce while ensuring Brandt’s best-in-class ground contact and rolling land negotiation.

The new 102ft unit also features steerable wing wheels, increased wheel flotation, larger wing knuckles and more; all geared to making it the #1 choice for prairie farmers.

This exciting new product will be unveiled at the Brandt Agricultural Products Ltd. booth at Canada’s Farm Progress Show in Regina, June 17-19, 2015.
