Brandt Launches New 8200 Contour Commander

At the largest outdoor farm show in Western Canada, Brandt launched the new **8200 Contour Commander** heavy harrow. As farming operations grow, Brandt equipment continues to adapt and meet the increasing demands of agriculture. The Brandt Contour Commander heavy harrow is the ultimate in seed bed preparation, for smooth, worry free seeding in all types of terrain, and the new 82 foot harrow covers more distance, ensuring seeding is completed quicker.

- **New 82 foot width** – Taking advantage of the higher horse power available in tractors, Brandt has expanded the Contour Commander to an 82 foot width, ensuring more distance is covered, and seeding is completed quicker.
- **Parallel Link** – Each section is suspended from support arms by four pivoting parallel link arms. This ensures a continuous, 28 inch range of travel and that all tines maintain constant contact with field surface and adjacent sections.
- **Solid Pull** – Continuous solid pull when cornering eliminates snap back, a common problem with a cable type pull harrow.
- **Tine Angle Adjust** – The optional hydraulic tine angle adjust allows fast and easy adjustment right from the tractor. With hydraulically adjustable tine angles, the angle can be changed from an aggressive 90 degrees to a less aggressive 45 degrees quickly and easily without leaving the tractor.
- **Fast Fold and Unfold** – The strong and efficient latch system with integrated hydraulics makes it easy to move from field position and back, all from the comfort of the tractor.

“The 8200 Contour Commander was designed to meet the growing demands of today’s larger farm operations,” says Arnie Josephson, Sales Manager for Brandt Agricultural Products Ltd. “Taking advantage of the higher horse power available in tractors, the 82 foot width allows farmers to cover more acres in a day. Our customers rely on Brandt to prepare their seed bed, and this new product will help them get the job done faster, taking advantage of optimum seeding time.”

Brandt Agricultural Products Ltd. engineers and manufactures spraying equipment, heavy harrows, bale processors, and a complete line of grain handling equipment including grain augers, grain belt conveyors, grain carts, grain vacs, grain bag loaders, and grain bag unloaders.
