Brandt Launches New 1300 Bushel GrainCart 1322XR

Regina, Saskatchewan – Brandt is proud to announce the addition of the new **GrainCart 1322XR** to the most complete grain handling line-up in the industry. Unveiled at the 2012 Canada's Farm Progress Show in June, the new **GrainCart 1322XR** has the extra reach that Brandt is known for, combined with high capacity that modern farm operations need

The large 1300 bushel GrainCart unloads all of the grain from busy combines with the fast 22 inch HP auger. This allows for unloading speeds of up to 620 bushels per minute so you can load your trucks and get back to the combine before it's full.

Four extra heavy duty 170 load range tires on tandem walking beam axles, provides industry leading load capacity while maintaining reliability - even when cart is completely full.

The unique front folding auger design gives greater reach and clearance between cart and trailer while unloading, and the fully adjustable discharge spout is positioned 34 inches closer to the tractor cab for increased visibility, providing safe, fast, and easy truck loading.

Triangular support brackets inside the tank with no ledges or other catch points, allows the grain to flow smoothly out of the cart for a simple and complete cleanout.

"This new GrainCart is ready to work at the speed of modern farming." says Arnie Josephson, Sales Manager for Brandt Agricultural Products Ltd., "Our customers demand reliable and high capacity products to keep the combines moving during harvest, and our 1322XR lives up to those demands. "

Brandt Agricultural Products Ltd. engineers and manufactures spraying equipment, heavy harrows, and a complete line of grain handling equipment including grain augers, grain belt conveyors, grain carts, grain vacs, grain bag loaders, and grain bag unloaders.
