

SWING MACHINES

2154D/2454D/2954D/3754D

JOHN DEERE

Welcome to the top of the food chain.

Years in dense woods have evolved some seriously tough traits in the new generation of John Deere D-Series Swing Machines. From the smaller but muscular 2154D to the larger 3754D beast, these machines feature beefy new structures and next-size-up components — all purpose-built to perform. Their powerful swing systems, improved horsepower, and new hydraulic systems promise increased productivity. Even the ride itself can't be beat, from the comfort of secure and roomy rear-entry or raised cabs. As log loaders or shovel loggers, road builders, processor/harvesters, or stroke delimeter carriers, D-Series Swing Machines prove that anything less is really just prey.

- The robust machine design gives you powerful performance, no matter what model or configuration you choose.
- The John Deere PowerTech™ E and PowerTech Plus engines, which meet EPA Tier 3 emissions requirements, boast excellent fuel economy with high torque at low rpms.
- Each D-Series Swing Machine can take on even the toughest of forests, with a tough, next-size-up swing system and heavy-duty upper frames in the 2154D, 2454D, and 2954D, and an auxiliary swing drive for increased swing torque during log loading in the 3754D.

	2154D	2454D	2954D	3754D
Engine	JD6068 PowerTech E Tier 3-compliant engine	JD6068 PowerTech Plus Tier-3 compliant engine	JD6068 PowerTech Plus Tier-3 compliant engine	JD6090H PowerTech Plus Tier 3 compliant engine
Net Peak Power (ISO 9249)	119 kW (159 hp)	145 kW (194 hp)	145 kW (194 hp)	220 kW (296 hp)
Max. Hydraulic Flow	472 L/m (124.6 gpm)	496 L/m (131 gpm)	496 L/m (131 gpm)	608 L/m (160.6 gpm)
Swing Torque	74 606 Nm (54,857 lbf.)	77 140–107 869 Nm (56,896–79,560 lbf.)	111 194 Nm (81,950 lbf.)	111 194–148,574 Nm (81,950–109,500 lbf.)
Drawbar Pull	22 634 kg (49,900 lb.)	25 435 kg (56,075 lb.)	30 812 kg (67,929 lb.)	36 102 kg (79,590 lb.)

A machine as responsive as the company that built it.

The story goes like this: You asked for it and John Deere listened — the new D-Series Swing Machines combine plenty of new features to give you productivity like never before. Swing torque, tractive effort, horsepower, hydraulic flow, and the seamless integration of the attachment and carrier are all worth bragging about. The 2954D boasts 12 more inches of additional reach and a larger arm cylinder that promises additional lifting power, while the 3754D packs a punch with its 296 horsepower. It's these powerful features that make each machine as responsive as the company that made it.

– **Tier 3-certified engines:**

Provide the horsepower required to get the job done while delivering excellent fuel economy regardless of the machine's size and weight.

– **"Smart cooling package":**

Cool-on-demand, variable-speed, hydraulically driven cooling fan reduces fuel consumption and noise.

– **Debris management:**

External screening, sealed cooler compartment, and optional automatic reversing fan help eliminate the downtime associated with cooling system servicing.

– **Robust upper frame:** Strong boom-tower arrangement, thick base plates, after-welding machining in critical areas, and large-diameter swing bearings make these machines extremely durable.

– **Ease of Service:** Remote-mounted engine and hydraulic oil filters and dynamic test ports.

– **Robust Booms and Arms:** New heavy-duty booms and arms are ready to take on all applications, whether it be building roads or processing or handling trees.

– **Durable Undercarriage:** Robust structures, next-size-up components and drive systems, and heavy-duty track chains deliver both productivity and durability.

– **Improved component protection:** Three-piece heavy-duty engine enclosure, new under-house protection system, new hydraulic filter guard and muffler protection, and heavier right rear door all work to keep the machine's valuable components safe from damage.

– **Attachment integration:** Deere is the industry leader, with purpose-built processing fronts and integrated attachments delivered from the factory.

Productivity in total comfort? We're On It.™

You asked for a well-designed cab so operators could experience both productivity and comfort on the job. We delivered. Even getting in the cab is easy. Depending on the machine's application, the cab comes mounted on either a 178 mm (7-in.) or 1219 mm (48-in.) hydraulically tilting riser. And, all models have optional rear-entry cabs with integrated steps. These new D-Series machines provide the ultimate working conditions while ensuring maximum productivity. You asked for maximum comfort and optimum visibility, and we listened.

– **Forestry cab:** The side-entry cab has integral vertical bars and polycarbonate windows, meeting all safety requirements for forestry applications while maximizing visibility.

– **All-season comfort:** Climate control is available with side-entry cabs, while the rear-entry option comes with increased air-conditioning capacity to ensure operator comfort in the larger roomy cabs.

– **Comfortable suspension seat:** Covered in durable cloth, the seat can be custom-fit to ensure that all levers and pedals are easily accessible to whomever is king of the forest at any given time. The seat also features a reclining back with adjustable armrests and headrest for extra comfort.

– **Optional air-ride heated seat:** An optional deluxe seat offers low-frequency suspension with automatic weight adjustment, 24-volt air suspension, heated seat and back cushions, variable-suspension damper, double-locking roller slide rails, seat-cushion extension and tilt, and Sittab Armflex adjustable armrests. Available with either a lap belt or four-point restraint system for shovel-logging applications — operators can focus on work, without sliding out of their seats.

1. Visibility: To complement great forward visibility, sight lines have been verified using 3-D modeling to maximize worksite visibility.

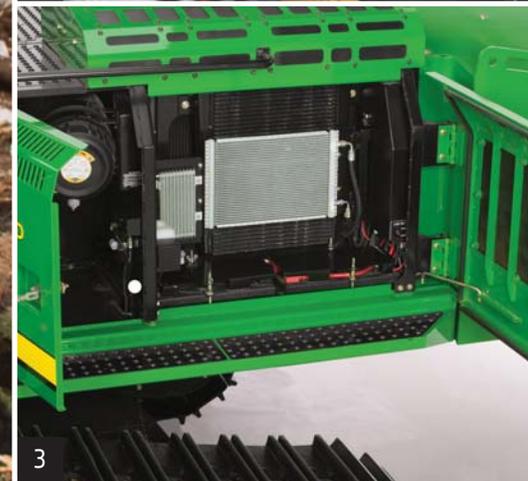

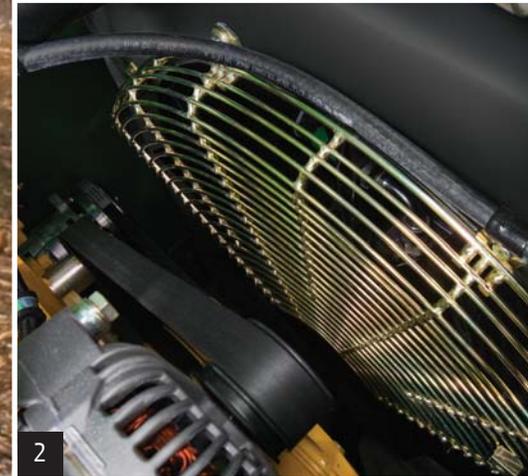

2. Strategically placed controls: Joystick controls and accessory switches are within easy reach for your operator's convenience and safety.

3. Rear-entry cab: This option offers external guards combined with polycarbonate or glass windows to ensure operator safety. These cabs are much larger for added comfort and storage, and they provide improved access whether you're coming or going.

It's one machine that
won't let you down.

These new D-Series machines were bred for improved durability. Purpose-built to stand up to harsh forest environments, each durable D-Series model features a sturdy steel frame, heavy-duty track chain, a swing system sized with larger bearings for extended life (2154D, 2454D and 2954D), and external debris management features that maximize uptime. The hydraulic, cool-on-demand fan with a reversing option keeps the machine producing. And the standard 1050 Liter (277-gallon) fuel tank allows for extended run times between fill ups. Even the huge 3754D runs for an impressive 35–45 hours between fuel fills.

1. **Boom, arm, and frame:** The boom foot area has been strengthened and is now machined after all welding is complete. This, along with the addition of turned and ground pins and new boom and arm designs, keeps the D-Series running and eliminates unnecessary downtime.
2. **“Smart cooling package”:** The hydraulically driven on-demand fan runs only when needed, maximizing the use of available horsepower and reducing fuel

- consumption and noise. The reversing fan option eliminates the downtime usually needed for cooling-package maintenance.
3. **Debris-management system:** Integrated in the left side guarding, this smart system keeps materials and debris from entering the cooling-package area to enhance your total productivity.

– **Improved component protection:** This peace-of-mind package includes guards

to protect the hydraulic oil filler cap and exhaust stack; a heavier pump door with support; sealed under-decking panels; and a tough three-piece, purpose-built engine enclosure.

– **Resilient design features:** The newly designed log loader fronts, purpose-built processor fronts, and heavy-duty excavator fronts allow the machines to keep running in the toughest applications.

A machine that won't break your bank.

This is one hard worker that goes easy on your wallet, even as it ages. The remote-mounted fuel and oil filters, easily accessible oil-sampling valves, and the relocated fuel filler make regular fueling a cinch. A hydraulically driven cooling system that runs only when needed, an efficient engine that keeps fuel consumption in check, and an easy-to-reach engine cover all combine to add to your bottom line. The machine's debris-management features, including sloped sides around the engine housing and removable screens where needed, also cut down on maintenance headaches and costs. And sturdy, well-placed handrails and aggressive antislip material improve safety while cutting liability concerns. Rest assured — you won't be left with an empty wallet.

1. Remote-mounted oil filters: Newly designed with accessibility in mind, the oil filters can be changed quickly and easily to improve productivity through effortless regular maintenance.

2. Fuel economy: Designed for optimal fuel economy, the John Deere PowerTech engine provides hearty performance with manageable fuel costs.

3. Fuel filler: Newly relocated forward and outboard, and accessed via strategically located handholds, the fuel filler enables for faster and easier fueling.

4. Debris management: Perforations in the hood and left rear door serve as a “first filter,” preventing trash entry. Anything that passes through will also need to clear the cooler cores.

– **On-demand fan with reversing option:** By kicking in only when necessary, this hydraulically driven fan reduces fuel consumption and noise. The reversing-fan option improves uptime by keeping your robust cooling system clean.

– **Auxiliary oil cooler:** Standard on factory-installed processor hydraulics and optional on all other configurations, this feature complements the main cooling system and is recommended for high-duty cycle applications.

– **Oil-sampling valves:** These strategically placed dynamic fluid-sampling valves make preventive maintenance easy.

Your choice: Purpose-built configurations within the D-Series family.

Whatever the task at hand — from building roads to shoveling logs to harvesting and processing — each D-Series Swing Machine rises to the occasion powerfully and efficiently. Purpose-built to be the toughest in the woods, the D-Series is available as a road builder, harvester/processor, live-heel log loader, butt-&-top log loader, or stroke delimeter. Take a closer look at key configurations designed for your specific application.

Powerful Combination.

Nothing beats a D-Series processor. It's the perfect carrier and head combination package for your harvesting applications, be it roadside processing or in-the-woods harvesting. With a hydraulic system that provides superior levels of hydraulic power coupled to a factory-installed, industry leading Waratah head, the D-Series processors deliver unmatched performance, productivity, and uptime. Clean hose routing, advanced cooling packages, increased protection, and even strategic positioning of the Automation system components allow the D-Series processors to provide our customers with a superior design for ultimate operator performance and the highest customer satisfaction levels.

- D-Series Processors for the 2154D, 2454D, and 2954D are factory engineered and integrated with Waratah heads — a harvesting package that's tough to beat.
- Waratah attachments are known for their durability, reliability, and precision — all attributes that optimize your harvesting productivity and uptime.
- The John Deere processor package has gone through no-holds-barred testing to ensure compatibility and reliability in even the most challenging environments.
- The machine's hydraulic system is designed to provide maximum hydraulic performance to the attachment, resulting in improved functioning performance and increased speed.

Engine	2454D Road Builder	2454D Processor	2454D Live Heel	2454D Butt & Top	2454D Power Clam
Manufacturer and Model	John Deere 6068H				
Non-Road Emission Standards	EPA Tier 3/EU Stage IIIA				
Cylinders	6				
Engine Displacement	6.8 L (415 cu. in.)				
Net Peak Power (ISO 9249)	145 kW (194 hp)				
Off-Level Capacity	100% (45 deg.)				
Aspiration	Turbocharged, air-to-air charge air cooler				
Cooling					
Fan Drive	Cool-on-demand hydraulic-driven, suction-type, remote-mounted drive				
Engine Coolant Rating	-37 deg. C (-34 deg. F)				
Powertrain					
2-speed propel with automatic shift					
Maximum Travel Speed					
Low	3.3 km/h (2.1 mph)				
High	5.5 km/h (3.4 mph)				
Controls	Pilot levers, low effort; hydraulic pilot with shutoff lever				
Hydraulics					
Open center, load sensing					
Main Pumps					
Maximum Rated Flow x 2	248 L/m (65.5 gpm)				
Pilot Pump (one gear)					
Maximum Rated Flow	37 L/m (9.7 gpm)				
System Relief Pressure	3900 kPa (566 psi)				
Secondary Pump (one gear)					
Maximum Rated Flow	37 L/m (9.7 gpm)				
System Relief Pressure	20 600 kPa (2,988 psi)				
System Operating Pressure					
Implement Circuits	34 336 kPa (4,980 psi)				
Travel Circuits	34 336 kPa (4,980 psi)				
Swing Circuits	32 405 kPa (4,700 psi)				
Power Boost	36 266 kPa (5,260 psi)				
Auxiliary Hydraulic Flow	Adjustable through monitor				
Cylinders					
Heat-treated, chrome-plated, polished cylinder rods; hardened steel (replaceable bushings) pivot pins

2954D

Engine	2954D Road Builder	2954D Processor	2954D Live Heel	2954D Butt & Top	2954D Power Clam
Manufacturer and Model	John Deere 6068H				
Non-Road Emission Standards	EPA Tier 3/EU Stage IIIA				
Cylinders	6				
Engine Displacement	6.8 L (415 cu. in.)				
Net Peak Power (ISO 9249)	145 kW (194 hp)				
Off-Level Capacity	100% (45 deg.)				
Aspiration	Turbocharged, air-to-air charge air cooler				
Cooling					
Fan Drive	Cool-on-demand hydraulic-driven, suction-type, remote-mounted drive				
Engine Coolant Rating	-37 deg. C (-34 deg. F)				
Powertrain					
2-speed propel with automatic shift					
Maximum Travel Speed					
Low	1.6 km/h (1.0 mph)				
High	4.0 km/h (2.5 mph)				
Controls	Pilot levers, low effort; hydraulic pilot with shutoff lever				
Hydraulics					
Open center, load sensing					
Main Pumps					
Maximum Rated Flow x 2	248 L/m (65.5 gpm)				
Pilot Pump (one gear)					
Maximum Rated Flow	37 L/m (9.7 gpm)				
System Relief Pressure	3900 kPa (566 psi)				
Secondary Pump (one gear)					
Maximum Rated Flow	37 L/m (9.7 gpm)				
System Relief Pressure	20 600 kPa (2,988 psi)				
System Operating Pressure					
Implement Circuits	34 336 kPa (4,980 psi)				
Travel Circuits	34 336 kPa (4,980 psi)				
Swing Circuits	32 405 kPa (4,700 psi)				
Power Boost	36 266 kPa (5,260 psi)				
Auxiliary Hydraulic Flow	Adjustable through monitor				
Cylinders					
Heat-treated, chrome-plated, polished cylinder rods; hardened steel (replaceable bushings) pivot pins					
Boom (2)					
Bore	135 mm (5.3 in.)	135 mm (5.3 in.)	150 mm (5.9 in.)	150 mm (5.9 in.)	150 mm (5.9 in.)
Rod Diameter	95 mm (3.7 in.)	95 mm (3.7 in.)	105 mm (4.1 in.)	105 mm (4.1 in.)	105 mm (4.1 in.)
Stroke	1360 mm (53.5 in.)	1360 mm (53.5 in.)	1307 mm (51.5 in.)	1307 mm (51.5 in.)	1307 mm (51.5 in.)
Arm (1)					
Bore	150 mm (5.9 in.)	150 mm (5.9 in.)	170 mm (6.7 in.)	170 mm (6.7 in.)	170 mm (6.7 in.)
Rod Diameter	105 mm (4.1 in.)	105 mm (4.1 in.)	115 mm (4.5 in.)	115 mm (4.5 in.)	115 mm (4.5 in.)
Stroke	1659 mm (65.3 in.)	1659 mm (65.3 in.)	1740 mm (68.5 in.)	1740 mm (68.5 in.)	1740 mm (68.5 in.)
Bucket (1)					
Bore	135 mm (5.3 in.)	N/A	N/A	N/A	N/A
Rod Diameter	90 mm (3.5 in.)	N/A	N/A	N/A	N/A
Stroke	1070 mm (42.1 in.)	N/A	N/A	N/A	N/A
Heel (1)					
Bore	N/A	N/A	135 mm (5.3 in.)	N/A	N/A
Rod Diameter	N/A	N/A	90 mm (3.5 in.)	N/A	N/A
Stroke	N/A	N/A	1070 mm (42.1 in.)	N/A	N/A
Tilt (1)					
Bore	N/A	N/A	N/A	115 mm (4.5 in.)	115 mm (4.5 in.)
Rod Diameter	N/A	N/A	N/A	80 mm (3.1 in.)	80 mm (3.1 in.)
Stroke	N/A	N/A	N/A	1060 mm (41.7 in.)	1060 mm (41.7 in.)

Attachment weight is included when calculating the lift capacities.

Boldface type indicates hydraulic-limited capacities with power boost; lightface type indicates stability-limited capacities. Figures do not exceed 87 percent of hydraulic capacities or 75 percent of weight needed to tip machine.

-1.5 m (-5 ft.)	13 472 kg (29,700 lb.)	13 472 kg (29,700 lb.)	9934 kg (21,900 lb.)	8573 kg (18,900 lb.)	7258 kg (16,000 lb.)	5851 kg (12,900 lb.)	4990 kg (11,000 lb.)	4218 kg (9,300 lb.)				
-3.1 m (-10 ft.)	9707 kg (21,400 lb.)	9707 kg (21,400 lb.)	7439 kg (16,400 lb.)	7439 kg (16,400 lb.)	5216 kg (11,500 lb.)	5216 kg (11,500 lb.)						

Attachment weight is included when calculating the lift capacities.

Boldface type indicates hydraulic-limited capacities with power boost; lightface type indicates stability-limited capacities.

Figures do not exceed 87 percent of hydraulic capacities or 75 percent of weight needed to tip machine.

3754D

Engine	3754D Road Builder	3754D Live Heel	3754D Butt & Top
Manufacturer and Model	John Deere 6090H		
Non-Road Emission Standards	EPA Tier 3/EU Stage IIIA		
Cylinders	6		
Engine Displacement	9.0 L (549 cu. in.)		
Net Peak Power (ISO 9249)	220 kW (296 hp)		
Off-Level Capacity	100% (45 deg.)		
Aspiration	Turbocharged, air-to-air charge air cooler		
Cooling			
Fan Drive	Cool-on-demand hydraulic-driven, suction-type, remote-mounted drive		
Engine Coolant Rating	-37 deg. C (-34 deg. F)		
Powertrain			
2-speed propel with automatic shift			
Maximum Travel Speed			
Low	3.4 km/h (2.1 mph)		
High	5.5 km/h (3.4 mph)		
Controls	Pilot levers, short stroke, low effort; hydraulic pilot with shutoff lever		
Hydraulics			
Open center, load sensing			
Main Pumps			
Maximum Rated Flow x 2	304 L/m (80.3 gpm)		
Pilot Pump (one gear)			
Maximum Rated Flow	34 L/m (8.9 gpm)		
System Relief Pressure	3900 kPa (566 psi)		
Maximum Secondary Pump Flow			
34 L/m (8.9 gpm)			
System Operating Pressure			
Implement Circuits	34 300 kPa (4,975 psi)		
Travel Circuits	34 300 kPa (4,975 psi)		
Swing Circuits	34 300 kPa (4,975 psi)		
Power Boost	36 300 kPa (5,265 psi)		
Pilot Circuits at 34 L/m (8.9 gpm)	3900 kPa (566 psi)		
Cylinders			
Heat-treated, chrome-plated, polished cylinder rods; hardened steel (replaceable bushings) pivot pins			
Boom (2)			
Bore	145 mm (5.7 in.)	170 mm (6.7 in.)	170 mm (6.7 in.)

WE WORK FOR THE GUYS WHO LOOK DOWN ON THE CLOUDS.

Forestry is a way of life. A calling passed through generations. One that gets in your blood and takes everything you've got. But one that you'll never give up. And that's why we're dedicated to building machines and solutions specifically for the work you do. It's our way of making one of the toughest jobs in the world just a little bit easier.
