GRAINBAG EQUIPMENT

Brandt

3010 & 3010HP GRAINBAG LOADERS

Industry leading capacity.

Fast, easy, and versatile grain storage. Our wide tunnel design ensures a more uniform grain bag filling operation.

Fill Faster

Possessing industry leading capacity of up to 30,000 bu/hr, Brandt GrainBag Loaders fill quickly, saving you time at harvest. This incredible capacity is achieved through the combination of the extra-large hopper and Brandt's 20 inch loading auger; allowing you to easily fill from either side without worrying about spilling.

Perfectly Filled Bags- Every Time

By offering more tunnel room and less restriction, Brandt GrainBag Loaders ensure your bags are filled to capacity consistently. Brandt's wide tunnel design distributes grain more evenly giving your bags the ideal shape and reduces stress on the corners, removing excess oxygen and protecting the grain.

Store More

Brandt's new 3010HP GrainBag Loader has a specially designed tunnel that can handle bags up to 500 foot long. That extra capacity means you can store up to 22,000 bushels in a single bag so you can spend less time switching bags.

Easy Bag Loading

The 3010HP has more features included as standard to make bagging easier. Loading bags is smoother than ever with a jib crane to do the heavy lifting while the bag loading apron helps guide the bag into place. Filling bags is also made even easier with the HP thanks to its larger 9' 9" x 7' hopper and easy access platforms.

8510 GRAINBAG UNLOADER

Outstanding unload times.

Your time is valuable. Spend less of it emptying your grain bags. Designed for durability and capacity, this machine is capable of an impressive 8,500 bushels per hour.

 **50** HORSEPOWER

Outstanding Performance

Holding true to the Brandt name the 8510 GrainBag Unloader delivers an outstanding 8,500 bushel per hour capacity while requiring as little as 50 HP to operate. Both of the 8510's augers; the 10 inch diameter cross auger and 17 inch main auger possess Brandt's Extended Life Flighting making these units not only fast but also durable.

Simple and Accessible Operator Controls

Mounted at ground level for maximum control the Brandt 8510 GrainBag Unloader has a four function hydraulic control valve giving you immediate control of all grain bag unloading functions. It also includes a uniquely designed, self-storing knife and a spring loaded clutch, both of which are able to be set-up, disengaged and stored without the use of any tools.

ATTACHMENT OPTIONS

3012HP GRAINBAG LOADER

Maximum storage.

The 3012HP allows you to store up to 33,000 bushels in a single 500 foot bag so you can make the most of your flexible storage system.

Loads More

Brandt's new 3012HP GrainBag Loader gets the most out of your flexible grain storage. The 110-square foot main hopper and 20" diameter fill auger. The 12 foot bagging system gets you 50% more storage capacity than a 10 foot bag and allows you to spend less time switching bags and more time harvesting. The one-piece tunnel design distributes grain evenly for smooth operation.

Worry-Free Operation

Loading your bags has never been easier than with the Bag Loading Tarp; an innovative solution that works in tandem with the Jib Crane and Powered Trolley system to allow bags to be loaded with minimal effort. The specially designed cradle speeds up bag management and handling for heavy 12 foot bags while the Bag Retention System ensures proper loading and rigging of the bags.

12012HP GRAINBAG UNLOADER

Unsurpassed speed.

The 12012HP GBU's industry leading 12,000 bu/hr capacity unloads bags faster so you can get grain to market on a moment's notice.

PTO Driven Hydraulics

The integrated PTO driven hydraulic system features a dedicated pump for each component and a cooling system to maximize reliability. The standalone system is driven by a robust step-up gearbox and features a built-in filtration system and 70 gallon reservoir.

Smooth Operator

The adjustable axle height controls the height of the cross auger to keep a consistent auger height while the hydraulic bag roller smoothly and evenly captures the bag. The adjustable bag knife can be positioned to match the varying height of bags filled with different types of grain.

HP TRUCK UNLOADING AUGER

Maximized grain loading performance.

Turns your Brandt Grain Bag Loader into a swing away auger allowing you to directly unload your center dump grain trailers at up to 11,900 bushels per hour.

Quick and Easy Maneuverability

Moving and adjusting the Brandt HP Truck Unloading Auger is quick and easy thanks to its hydraulic wheel mover. This rugged mover is designed for easy hopper positioning and coupling it with the heavy duty winch makes the transition from operation to transport mode seamless. Once positioned the hopper stays put under the truck while the bagger moves along.

Compact Versatility

The larger 83-inch long low profile hopper, twin augers and flat-free tires provide versatile unloading in all operating conditions.
