FIELD.

Transfer GrainBelts

The Perfect Team.

Portable and compact, Brandt Transfer GrainBelts can be used to feed your Swing Away Auger or Harvest GrainBelt. Available in 15", 20", or 24" models for an unbeatable combination of speed, gentleness and versatility while unloading trucks, gravity wagons and belly dump trailers.

Easy Transport

Transfer GrainBelts feature adjustable wheels that allow for easy maneuverability over uneven terrain. Made to be easily towed on its own or paired with a Harvest GrainBelt.

Collapsible Hopper

The collapsible hopper uses tubing rather than flat bar for a stronger frame. Brandt's unique low-profile hopper allows it to fit under even the lowest of center-dump grain trucks.

Flood Feed

Match the capacity of your main swing away auger or grainbelt for optimal performance and minimal unload times.

Discharge Hood

The adjustable discharge hood allows you to direct the grain into any size or shape of bin. Removing the discharge hood allows you to throw the grain back into corners or into long and/or narrow storage facilities.

Powerful Value. **Delivered.**
