BRANDT CERTIFIED PROTECTION

UP TO \$730 OFF

INSPECT & PROTECT.

Save today and stay productive tomorrow with a Brandt Certified Inspection. Get exclusive savings on machine care inspections on **all makes** of construction equipment, if booked by March 31, 2026.

Why Get an Inspection?

Your equipment is your livelihood, so Brandt will make sure it's ready to go when you need it with a certified inspection.

Increased Uptime in Season

Downtime can be a disaster in season. It's costly—not just in repairs, but also in lost time. But when you've had your machine inspected and repaired by Brandt, your machine operates at peak performance all season long, so you get the job done on time, every time.

Cost Savings

By being on top of preventative maintenance with Brandt inspections, you can address issues before they become major problems. When you fix it before it breaks, you save big by avoiding pricey emergency repairs.

Longer Machine Life

In addition to avoiding costs associated with major breakdowns, your machine will be able to work harder and last longer, taking anything the work site can throw at it. That means a lower cost of ownership for you and an extended life for your machine.

Safety First

Brandt inspections identify potential failures in advance, helping to reduce injuries, accidents, or fire hazards. Maintaining equipment helps to keep everyone safe.

Brandt Rewards

A certified Brandt inspection rewards you with deals on parts, discounts on multiple machine inspections, and much more. For a full list of benefits, keep reading.

Inspect and Protect.
