## **Brandt Launches New 16HP Swing Away Auger**

**Regina, Saskatchewan** – Brandt is proud to announce the addition of the new **16HP Swing Away Auger** to the most complete grain handling line-up in the industry. Unveiled at the 2014 Canada's Farm Progress Show in June, the new **16HP Swing Away Auger** moves grain at incredible speeds to keep your trucks moving.

Available at dealers in 2015, Brandt 16HP Swing Away Augers are built for farmers who demand more. Offered in 85, 105, and 125 foot lengths this new auger can move as much as 23,000 bushels per hour, for higher throughput than ever before. The 16 inch diameter tube allows you to empty a Super-B trailer in minutes, eliminating bottlenecks at harvest and getting your trucks back on the road sooner.

16HP augers come with either hydraulic or electric EZSWING hopper mover systems. The electric EZSWING system features a long range remote with intuitive controls for easy operation from the seat of the cab.

Built strong to keep the auger steady and firmly planted on the ground 16HP augers use solid trussing to reduce droop making lining up to your bins easy.

Featuring a reversible 1000 rpm gearbox and constant velocity PTO, Brandt 16HP Augers are designed to handle the pressure of moving large amounts of grain in a hurry. Using square flight connections, a 4 inch core, and a chain coupler reduces stress on components and keeps the auger performing longer.

*"Farm sizes keep getting larger, and yields get bigger, but you still have only a small number of days to get the harvest completed," said Arnie Josephson Brandt's General Sales Manager. "With Brandt's new 16HP auger delivering over twice the capacity of a regular 13" Auger, it cuts trailer unloading time in half, adding hours to your day and ensuring maximum productivity while reducing the rush and stress surrounding harvest time."*

Brandt Agricultural Products Ltd. engineers and manufactures a complete line of grain handling equipment including grain augers, grain belt conveyors, grain carts, grain vacs, grain bag loaders, and grain bag unloaders as well as heavy harrows.
