## Brandt LP+ GrainBelt works even harder.

Updated workhorse gets more done without increasing engine size.

Brandt Agricultural Products Ltd. is pleased to announce the new high-efficiency 15' LP+ Field GrainBelt. Brandt engineers have modified the company's highly-popular LP model to achieve even greater performance and versatility without the need for expensive new powerplant requirements.

**"We've really pushed the limits with our original design and found ways to make a great product even better,"** says Brandt Agricultural Products Canadian Sales Manager, Arnie Josephson. **"The LP model has been a very popular one for us and producers will love it even more now, especially when they see how much more work LP+ can do for them without the need for a larger, more expensive powerplant."**

The newly re-engineered unit incorporates a high-capacity, reduced-friction intake design in conjunction with numerous other performance enhancements such as larger rollers and bearings, double lip seal intake with EZTRAK, and increased reach, hopper capacity and fuel capacity.

This exciting, freshly updated product will be unveiled at the Brandt Agricultural Products Ltd. booth at Canada's Farm Progress Show in Regina, June 17-19, 2015.
