New Brandt GrainVac is most efficient ever.

HP GrainVac produces top results.

Brandt Agricultural Products Ltd. is pleased to announce the launch of the new, high-capacity 1300HP GrainVac.

“We’ve taken our proven, leading-edge cone separation technology and built it into a more efficient, higher capacity GrainVac”, says Brandt Agricultural Products Ltd. General Sales Manager, Arnie Josephson. **“And, not only does this increase the full bin capacity to 8,000 bushels per hour, it also enhances performance when it's needed most; while cleaning out the bin.”**

Thanks to a more efficient design that utilizes higher fan speeds, Brandt's new 1300HP achieves increased performance in all phases of operation, resulting in less time spent cleaning up bin bottoms. Featuring Brandt's signature cone separation system, MaxFlo nozzle, and self-adjusting air throttle, this GrainVac runs more efficiently with fewer moving parts for reduced maintenance.

This exciting new product will be unveiled at the Brandt Agricultural Products Ltd. display (booth #8212) at Canada's Farm Progress Show in Regina, SK, June 15-17, 2016.

For more information, please visit www.brandt.ca or contact **Arnie Josephson** at (306) 791-7709 or ajosephson@brandt.ca.
