Brandt Releases Completely Redesigned 15" Top Drive Field GrainBelts

Regina, Saskatchewan – Brandt is proud to announce the launch of the newly redesigned **15" Top Drive Field GrainBelts**. Unveiled at the 2014 Canada's Farm Progress Show in June, the new **15" Top Drive Field GrainBelts** are the efficient solution to handle your most delicate commodities.

Brandt has completely redesigned our Top Drive GrainBelts, making them more efficient and versatile than ever before. Light enough to move by hand, the new Top Drives are available in 35 or 45 foot lengths and now feature a low profile intake. Using a 15" belt inside a 10" tube they can move up to 5,000 bushels per hour.

The drive system is more efficient than ever, using a low friction design with fewer moving parts than a conventional S-drive conveyor. Available in hydraulic or electric drive, it can be driven by a low horsepower single-phase motor or utility tractor. The unique design uses minimal flashing and reduced belt speeds to gently move and protect your valuable commodities.

Now featured on the Top Drive, the EZTRAK tensioner and visual indicator ensures correct belt tension to extend the life of the bearings and belt. With precision rollers, rubber belt, and integrated windguards, they are built to last.

"Our new Top Drive GrainBelt provides the gentle handling and reliability that our customers need, along with a lower cost of ownership and operation, while still moving large volumes of grain in a hurry", says Arnie Josephson, Brandt's General Sales Manager.

Brandt Agricultural Products Ltd. engineers and manufactures a complete line of grain handling equipment including grain augers, grain belt conveyors, grain carts, grain vacs, grain bag loaders, and grain bag unloaders as well as heavy harrows.
