

H550

R30

BOOSTER F10

55-TON ON/OFF HIGHWAY TRAILERS

Heavy Hitter.

Introducing the all-new H550 Multi-Axle Beavertail On/Off Highway Transporter from Brandt. This heavy-duty trailer will make a lasting positive impact on your productivity.

1 Easier to Own

This trailer is backed by the best support in the business to make ownership stress-free:

- Flexible purchasing options include rentals, rental purchasing, leasing, and conventional financing.
- Brandt's advanced paint protection looks better, lasts longer, and inhibits corrosion for longer trailer life and increased resale value.
- Reliable design and long-lasting components reduce total cost of ownership.

2 Easier to Operate

Productivity is essential to your success, so we optimized the H550 for efficient operation:

- Simple, robust gooseneck connection gets you back on the road faster, even in rough terrain.
- Three-position ride-height valve is standard equipment and makes it quick and convenient to adapt these trailers to suit any road conditions.
- Patent-pending booster stability system locks the booster axle when backing up and when travelling over 60km/h for safer, easier handling.

Safer

Safety is critical on the jobsite, so the H550 is designed with key features to maximize operator protection:

- Extra-stroke shim legs eliminate pinch points, allowing shims to be safely added or removed while allowing infinite deckheight positions.
- Remotely-mounted air-tank drain valves make maintenance safer and faster.
- Non-skid surface treatments on optional deck and rear-frame trough covers ensure better traction for the operator.

HEAVY HAUL TRAILER DIMENSIONS

FEATURES

Low-profile Gooseneck

Combined with optimized air and electrical connections, the low-profile gooseneck allows equipment to be loaded further forward for maximum trailer payload.

Purpose-built Cylinders

Rod protectors come as standard equipment for maximum durability.

14 HP EFI Engine

Delivers 57% faster flow-rate than the competition while maintaining maximum lift capacity. Save time and money with faster starts, reduced downtime, and better fuel economy.

Three-position Ride-height Valve

Easily adjusts to varying terrain.

Wide Stinger

Improves stability when removing the gooseneck.

Infinite Neck Shimming

Spring-loaded shim legs have extra stroke, making it easy and safe to add or remove shims.

Industry-leading Powder-Coat Finish

Highly-durable paint and finish maximizes trailer life and resale value.

Accessible Maintenance Points

Remote air-tank drain valves save you time on daily maintenance.

Extra Heavy-duty Suspension Frame

Reinforced rear loading ramps and crossmembers provide unrivaled durability.

Longer Standard Knuckle Trough

Lower crossmembers allow your excavator to sit 5" lower, and could save you an overheight permit.

Rebound-limiting Chains

Protect the shocks, increasing the durability of the trailer.

Individual Suspension Shut-Off

Extend tire life by lifting an axle when travelling empty.

Extreme-duty Beavertail Construction

Utilizes thicker plate steel than competitors' designs for superior durability.

User-friendly Booster Connection

- Exclusive auto-latch system delivers the industry's fastest setup times.
- Multi-position integrated shim block for simple booster shimming.

Patent-pending Booster Stability System

- Locks the booster axle and dumps suspension air when backing up straight for safer, easier, and more stable reversing.
- Locks the booster axle in a straight position when travelling over 60km/h for safer, easier handling on the highway.

Additional Booster Features

- Vibration isolation shocks for improved durability.
- 25° steer axle delivers increased tire life and improved turning radius.
- Industry-exclusive axle alignment kit for improved tire life and operator confidence.
- 13.5" of axle travel for booster overload mitigation.
